

## Press release

### **PGS Software is proud to host an exhibition stand as a Platinum sponsor of the IDC UK DevOps Conference in London on 21st September 2017**

**London, 16 June 2017:** PGS Software is proud to host an exhibition stand as a Platinum sponsor of the IDC UK DevOps Conference in London on 21st September 2017.

The company's AWS Certified Solutions Architect, Łukasz Panusz, will be speaking at the event. He will be sharing his extensive knowledge of DevOps and providing insider insight into all the key areas surrounding this transformative topic.

IDC's DevOps Conference 2017 taking place in London, UK is the premier gathering for IT professionals. This one-of-a-kind event concentrates on the tantamount role that DevOps plays in accelerating improvements in enterprise agility at the heart of a digital transformation strategy. C-Suite Executives, IT directors, Enterprise Architects, Business and Operation strategists, and many other DevOps enthusiasts gather at the one-day conference to broaden their knowledge of this cutting-edge culture.

The conference's eighty delegates will give speeches conducive to fruitful roundtable and panel discussions. The event also serves as a unique opportunity to take part in networking sessions, one-to-one meetings, and workshops.

Some of the topics the participants will debate about include:

- DevOps Maturity – The Cultural Challenge
- DevOps role in Digital transformation
- DevQAOps – Next generation Development
- Disrupting IT operations through DevOps
- Succeeding in digital native development
- Security from within through DevOps
- Business driven DevOps

Adopting DevOps practices has quickly become immensely relevant for business growth. The participants of the IDC UK DevOps Conference 2017 will discuss how to enable faster delivery, better quality, and put in place continuous deployment schemes that appropriately respond to ever-changing business needs.

PGS Software's Łukasz Panusz will reflect on the real change in mindset, culture, and organisational operation that adopting a DevOps practice involves. More details regarding his presentation will be made available soon.
